Specifications Applicable to Shamrock Conduit Electrical Conduit Pipe Fittings

Rigid Metal Conduit Fittings – Galvanized

Underwriters' Laboratories, Inc. Standard, UL-6
American National Standards Institute, Inc., ANSI C 80.1
Canadian Standards Association, C22.2 No. 45-M1981

Intermediate Metal Conduit Fittings – Galvanized

Underwriters' Laboratories, Inc. Standard, UL 1242
American National Standards Institute, Inc. ANSI C 80.6

Aluminum Rigid Conduit Fittings

Underwriters' Laboratories, Inc. Standard, UL-6
American National Standards Institute, Inc. ANSI C 80.5
Canadian Standards Association, C22.2 No. 45-M1981

Electrical Metallic Tubing Fittings – Zinc Coated

Underwriters' Laboratories, Inc. Standard UL 797
American National Standards Institute, Inc., ANSI C 80.3
Canadian Standards Association, C22.2 No. 83-M1985

- Zinc Plating meets B633.
- NPT Threads Standard on Pipe ANSI/ASME B1.20.1-1983 R1992.
- NPS Threads on Couplings.

Materials

- Pipe: C1022 Continuous Welded Steel Pipe
- Couplings: C1022 Welded Steel Pipe
- Aluminum Items: AL6063
- All Ends are Deburred.
- Threads are Zinc Plated after Cutting.

The Department of Defense (DOD) has adopted the above-listed Underwriters' Laboratories standards in lieu of specific Federal specifications.

This is to certify that the above conduit fittings are manufactured and supplied in accordance with the provisions of the specifications shown in the listings.

Shamrock™

Kopr-Shield™ Compound

Kopr-Shield™ by Thomas & Betts meets the requirements of Section 300.6(A) in the 2002 NEC Code for Protection Against Corrosion.

“Where corrosion protection is necessary and the conduit is threaded in the field, the threads shall be coated with an approved electrically conductive, corrosion-resistant compound.”

The Copper Colloidal Surface Treatment That Protects, Lubricates and Enhances Conductivity Between All Electrical Connections

Good connections are one of the most important aspects of electrical work. Mechanics know how much down-time is caused when fluids or oils leak into the raceway system or looking for a weak link in a ground system caused by a high resistance connection. Mechanics also know how much time is spent keeping contacts, switches, lugs and other connectors clean or replacing parts because of “green scourage” build-up. Thomas & Betts has the solution to improve connections made in thousands of electrical and raceway installations made each day by electricians everywhere.

Kopr-Shield™ compound is a unique homogenized blend of pure, polished colloidal copper, rust and corrosion inhibitors that simultaneously protects, lubricates and enhances the conductivity of the mating surfaces to which it is applied. Extremely adhesive, Kopr-Shield™ compound flows smoothly into uneven contours and voids, making application easy, protection and lubrication complete and positive. A stable compound, it will not settle-out, thin, thicken, harden, or dry out under the most severe environmental conditions.

Kopr-Shield™ Compound has excellent temperature characteristics – brushed on at –50F to 250F (other compounds either turn solid or run like water at these extremes). Even at 1800F, Kopr-Shield™ remains intact for short terms.

Kopr-Shield™ Compound may be used to advantage in all electrical installations. When the environment is hostile to good electrical and mechanical connections, Kopr-Shield™ Compound is a must!

Use Kopr-Shield™ Compound for Battery Lugs and Cables.

- Prevention of “Green Scourge” corrosion.
- Reduction of resistance.
- Ease of terminal installation and removal.

Use Kopr-Shield™ Compound for Raceways.

- Lubrication – Ease of assembly and disassembly.
- Grounding Continuity Improved – Exceeds code requirements.

Use Kopr-Shield™ Compound for Fuse Clips.

- Even Heat Distribution – Elimination of hot spots.
- Oxidation Prevention – Prevents carbon path formation.
- Lubrication – Easy installation and removal of fuses.

Use Kopr-Shield™ Compound for Wiping Contacts, Drum Switches and Slip Rings.

- Prevention of galling, burning, pitting and discoloration.
- Suppression of arcing and dissipation of coronas.
- Lubrication for ease of operation.

Thomas & Betts

Your electrical connection.

Time-saving features ... Thomas & Betts quality!

Terminals. Cable ties. Cable trays. Tools. And thousands of other electrical wire and conduit termination/management products. All designed to save installation time. And all available from the company behind the industry's most trusted brands—Thomas & Betts.

Kindorf channel- Modular, corrosion resistant metal framing is a snap to install.

Whether you're stocking a crib program or using advanced JIT

procurement, specifying Thomas & Betts products can help you reduce inventory and handling costs now, and help you save installation time.

For more information on the broadest line and the best brands in the industry, see your Thomas & Betts distributor or call **1-888-862-3289**.

T&B Cable Tray - Steel and aluminum tray systems for raceway management.
