

MODULAR RANGE OF QUICK RELEASE COUPLINGS **RBE**

ALL FLUIDS

A solution for each of your applications

Designed for applications in all industrial sectors and research and development for the connection of your circuits of:

- gases : hydrogen, argon, nitrogen, helium, etc...,
- steam,
- solvents and acids,
- liquids,
- high pressures,
- vacuum...

The RBE ALL FLUID range offers you a product range which is :

- A modular design
- Reliable
- Quick and Automatic
- Efficient
- Safe
- Leak tight

gases

liquids

steam

solvents

high pressures

vacuum

Modular Design

The RBE ALL FLUID range is entirely modular and very complete, offering the choice of :

- 5 sizes of coupling,
- 3 material options,
- 7 seal options,
- 3 shut-off options,
- various further options.

It makes it possible for you to select the quick release coupling suited to your application and appropriate to the fluid :

- type of fluids,
- pressure,
- temperature and flow.

To respond to specific requirements of certain industries, the RBE range also includes quick release couplings for:

■ **Heavy Steel Industry applications** using oxygen, fuel gas and inert gas (RBE 11 / UR version).

■ **Nuclear Industry applications** (RBE / IC / TL version).

Proven reliability

The particular technology of the STÄUBLI range of couplings gives a long service life at a low operating cost.

Quick and Automatic

Connection and Disconnection is a one-handed operation :

- connection by pushing the plug into the socket.
- disconnection by simply pushing the push button.

Efficient

The RBE ALL FLUID range of couplings offers a very good flow for a given size of coupling.

Safety

Thanks to the coupling design, the quality of materials used and the appropriate seals for each fluid.

Safety is a particularly important criterion for gas and corrosive fluid circuits.

STÄUBLI long life seal tightness

proven after over 50 years of use in industrial connection of fluids and gases.

We suggest you select the suitable quick release coupling yourself which best serves your needs...

5 steps to construct your required quick release coupling...

| Double shut off | 6.2 | 19 | 46 | 92 | 245 |
| Unvalved | 13 | 45 | 110 | 245 | 660 |

Hydraulic flow in l / min for a speed of 5 m / s

| | | | | | |
|-----------------|-----|-----|------|------|------|
| Single shut off | 2.1 | 7.2 | 15.1 | 28.5 | 85 |
| Double shut off | 1.5 | 5 | 12.2 | 24.5 | 76.5 |
| Unvalved | 2.1 | 7.2 | 15.1 | 28.5 | 85 |

See flow chart pages 10 / 11.

Materials used

The choice of materials depends on :

- the fluid being transferred,
- the max. operating pressure and
- the external environment.

Low and medium pressure

Air, various gases, oils, hydrocarbons...
without any particular anti-corrosion resistance.

Maximum working pressure : 50 bar

Standard Series :
Largely stainless steel with 17% chrome content.
Coupling back adaptor :
anti-corrosion treated steel.

standard

Water, air, various gases, oils, hydrocarbons...

Maximum working pressure : 50 bar

IA Series :
Largely stainless steel with 17% chrome content.

code IA

Various corrosive gases, sea water, large number of chemical products in a corrosive environment.

Maximum working pressure : 15 bar

IC Series :
AISI 316L stainless steel.

code IC

High Pressure

High pressure liquids.

IA / HPL Series :
Stainless steel with 17% chrome content and AISI 316L stainless steel

code IA / HPL

High pressure gases.

IA / HPG Series :
Stainless steel with 17% chrome content and AISI 316L stainless steel
Plug body and push button : high resistance stainless steel

code IA / HPG

High pressure liquids and gases, with demanding resistance to corrosion requirements or decontamination.

IC / HPI Series :
AISI 316L stainless steel
Plug body and push button : high resistance stainless steel

code IC / HPI

Vacuum

Recommended for primary vacuum to 10^{-3} torr and for all applications demanding high integrity leak tightness.

Vacuum tightness : 1.10^{-3} cm³ / s. in connected and disconnected position.

Please consult us for more demanding applications.

IA / W and IC Series :
internal components :
AISI 316L stainless steel

code IA / W or code IC *

* Code IC for corrosive environment

For optimal functioning, it is essential to use sockets and plugs of the same materials.

| | Socket | Unvalved plug | Valved plug |
|-----------------------|----------|---------------|----------------|
| MATERIALS USED | standard | standard | standard or IA |
| | IA | standard | IA |
| | IC | IC | IC |
| | IA/HPL | HPL | IA/HPL |
| | IA/HPG | HPG | IA/HPG |
| | IC/HPI | IC/HPI | IC/HPI |
| | IA/W | standard | IA/W |

For hydraulic clean break applications, use our SPX couplings (see Catalogue F 125).

For pulsating hydraulic oil circuits or circuits subject to vibration, use our HPX quick release couplings (see Catalogue F 150).

Seals

The choice of seal material depends on :

- the fluid being transferred and
- the working temperature

- Usual applications.
- Good mechanical resistance.

Nitrile rubber (NBR) Seals

Operating temperature :
-15°C to +100°C

standard

- Good chemical resistance.
- Excellent resistance to high temperatures up to 200°C.
- Resistance to mineral oils, to synthetic hydraulic oils, to fuels, to chemical products, to hydrocarbons and to heat transfer fluids.

Fluorocarbon (FPM) Seals

Operating temperature :
-10°C to + 200°C

code JV

- Good resistance to high temperatures.
- Compatible with braking fluids with a phosphate – ester base, hot or cold water, steam.

Ethylene – Propylene (EPDM) Seals

Operating temperature :
-20°C to +150°C

Hot water, steam to 200°C.

code JE

- Combines qualities of elastomers with chemical resistance of PTFE.
- Remarkable resistance to heat and to most chemical agents including inorganic and organic acids.
- Heat transfer fluids.

Perfluoroelastomer (FFKM) Seals

Operating temperature :
0 to + 250°C

code JK

- Good resistance to low and high temperatures.
- Resistance to mineral oils and fuels.

Fluorosilicon (FMQ) Seals

Operating temperature :
-45°C to + 175°C

Max. operating pressure : 50 bar.

code JS3

- Good resistance to ageing and to refrigerating fluids.

Chloroprene (CR) Seals

Operating temperature :
-40°C to + 100°C

code JC

- Excellent chemical resistance.
- Good resistance to low and high temperatures.
- Superior performance to elastomers.

PTFE Seals

Operating temperature :
-50°C to + 200°C

Max. operating pressure : 80 bar.

code IA / JT or **code IC / JT**

In order to define the most suitable solution for your application, we ask you to supply us with the following details :

- type of fluid,
- pressure,
- temperature,
- concentration of salts and acids in water based fluids,
- particular operating conditions...

Do not hesitate to ask our Technical Sales Engineer to advise you. We place all our specialist quick release coupling knowledge at your disposal.

Valving

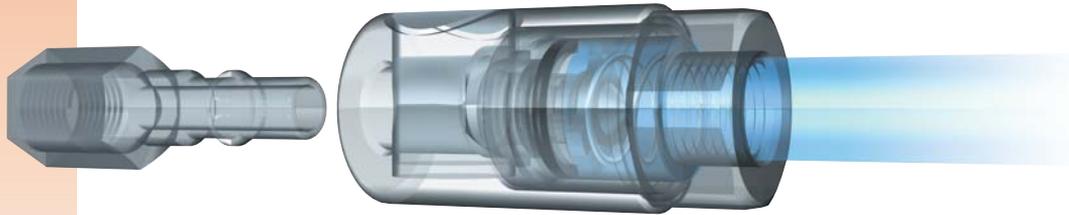

Single shut-off

- Non aggressive fluids,
- Non polluting fluids,
- Non toxic gases,
- Applications which require decompression of down-stream hose...

- Socket with automatic shut-off
- Unvalved plug

Socket : **standard**
Plug : **unvalved**

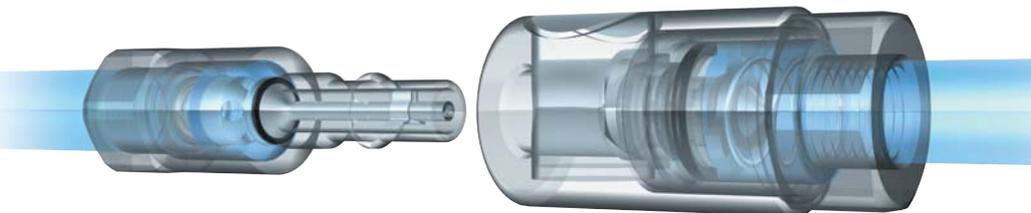

Double shut-off

- Oil circuits,
- Hydraulic circuits,
- Gases or dangerous / aggressive / polluting fluids,
- To minimise fluid spillage...

- Socket and plug with automatic shut-off

Socket : **code OD**
Plug : **with shut-off valve**

Unvalved

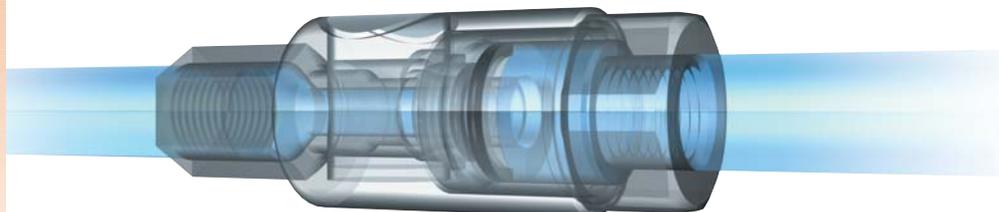

- Same uses as the "single shut-off" version,
- Better flow for a given bore.

Recommended for :

- fluids carrying particles,
- dirty water or chalky water,
- untreated water...

- Socket and plug unvalved

Socket : **code OS**
Plug : **unvalved**

5

Options

7 safety keys

preventing any errors of connection between various gases and fluids and permitting a clear identification of circuits.

Code 75*

Black 90°

Code 9

Mechanical safety :

2 slots are machined into the plug to give a keyway which corresponds with the 2 lugs on the socket.

Visual identification by :

- colour coding on plug and socket.

- coloured anodised facing disc for panel mounted sockets (except IC series).

For heavy steel industry applications on gases, we offer the RBE 11 / UR safety lock coupling range with stud safety keys.

* Codes 15 and 75 are not available on all diameters : see pages 12, 16, 20, 24 and 28.

Colour disc for built-in sockets

for immediate visual identification of circuits

| | | | | | |
|---|----------|-----------------|---|---------|-----------------|
|  | yellow | code DKJ |  | blue | code DKB |
|  | violet * | code DKW |  | brown * | code DKM |
|  | red | code DKR |  | black | code DKN |
|  | green | code DKV | | | |

* Violet and brown are not available on all diameters : see pages 12, 16, 20, 24 and 28.

Protection against dirt ingress code **VD / PP**

In connected position, the Chloroprene (CR) protector protects the functional components of the sockets against dirt and other external pollutants.

It must be combined with a VD push button.

Operating temperatures :
-20°C to + 90°C.

Not available for RBE03.

Raised push button code **VD**

Recommended for frequent connection / disconnection or use when wearing safety gloves.

Safety button code **VS**

(according to materials used)

To disconnect it is necessary to :

1. push back safety slider
2. push button

Fixing device for socket dust cap code **FB**

Dust caps to be ordered separately : see pages 15, 19, 23, 27 and 31.

Connection

The RBE ALL FLUID range comprises numerous connection possibilities (see part number pages).

Female threading

For rubber hose

For annealed or cold drawn copper tube

Male threading

For plastic tube (Rilsan, PTFE...)

For stainless steel drawn and calibrated tube

Male threads are supplied with :

- 60 degree sealing cone on IA and IC series sockets and all valved plugs.
Consult us regarding KES sealing kit (retaining ring and O ring seal).

Technical characteristics

- (1) Connection for rubber hose and installation with ear clamps or worm drive clamps.
- (2) Consult us for higher pressures.
- (3) **For dangerous gases**, according to the PED 97/23/CE (Pressure Equipment Directive), consult us for max. operating pressure
